

US Fintech Credit for ITIN-Only Founders — Master Guide

No-PG products · Soft-pull prequalification · Credit bureau reporting · ITIN accessibility

Prepared: June 4, 2026 | **Scope:** US fintechs & deposit-focused neobanks offering business/corporate cards and business loans/lines of credit, optimized for applicants holding only an ITIN (no SSN).

This master guide combines two research efforts into one document:

- **Part A — The One-Page Cheat Sheet:** the fastest path to building both credit files on an ITIN.
 - **Part B — Companies & Products:** who offers what, no-PG status, soft-pull prequalification, approval requirements, and ITIN accessibility.
 - **Part C — Credit Bureau Reporting Matrix:** which products report, to which bureaus, and whether it's ongoing positive or default-only.
-

PART A — One-Page Cheat Sheet: Build Both Credit Files on an ITIN

The core idea: You have *two separate credit files* — a **business** file (D&B, Experian Business, Equifax Business) and a **personal** file (Equifax, Experian, TransUnion). Build them in parallel. As an ITIN-only founder, lean on products that (1) do **no personal credit pull**, (2) accept **ITIN or passport** at the identity step, and (3) **report ongoing positive history**.

Step 0 — Foundation (week 1)

- Form a **US LLC/Corp** → get an **EIN** (ITIN qualifies you to request one).
- Get a **US business address + US business bank account**. ITIN/passport-friendly: **Mercury (Business)**, Wise, Baselane, Comun, Majority.
- Register a free **D-U-N-S number** (Dun & Bradstreet).

Build BUSINESS credit (no personal-credit exposure)

Do this	Best picks	Why
Open 3–4 net-30 vendors	Crown Office Supplies (all 3 bureaus), Quill , Grainger	Report positive history, EIN-only, no personal pull. <i>Avoid relying on Uline — may report negatives only</i>
Add a reporting no-PG card	Ramp (best no-SSN path), Brex , Mercury IO	All 3 business bureaus, no PG, no personal credit pull at all
Add a credit-builder tool	Nav Prime	Monthly tradeline to all 3 business bureaus
After 6–12 mo, graduate to a lender	OnDeck , Amex Business Blueprint , Bluevine	Larger limits, report ongoing positive to business bureaus

Build PERSONAL credit on an ITIN

Do this	Best picks	Why
Start with a credit-builder	Self (Builder + secured Visa)	All 3 consumer bureaus, no credit check , ITIN-friendly, two tradelines
Add a secured/starter card	Majority secured Visa, Tilt	Immigrant-built / ITIN-accepting (confirm bureaus)
Once you have a score	Capital One Spark (standard)	Rare business card that builds personal credit with ongoing positive reporting

Need capital without touching credit at all?

Square Loans · **Shopify Capital** · **Stripe Capital** · **PayPal Working Capital** — underwrite on your *platform sales*, no PG, no personal pull, and the first three **explicitly accept ITIN** (identity only). Trade-off: **they build no credit** and are invitation/offer-based.

Avoid / watch out

- **SBA loans** — 2026 rules require 100% US-citizen ownership (disqualifies ITIN-only).
- **Capital on Tap** — soft pull but **requires a PG**, so default hits personal credit.
- **Tomo** (not reporting in 2026), **Petal** (closed to new — now Tilt), **Sequin** (credit feature gone), **Stilt** (defunct).
- **"No-PG" ≠ "no SSN"** — almost every no-PG card still needs ITIN/passport for KYC identity. *Ask the issuer directly whether ITIN/passport satisfies the beneficial-owner check — that's the make-or-break step.*

The 5 best products for an ITIN-only founder

1. **Ramp** — no-PG card, documented no-SSN path, reports to all 3 business bureaus.
 2. **Mercury (Business) + IO** — open with passport+EIN; IO reports to all 3 business bureaus, no PG.
 3. **Self** — build personal credit on an ITIN (all 3 consumer bureaus, no credit check).
 4. **Crown Office Supplies + Quill + Grainger** — EIN-only business tradelines.
 5. **Stripe / Shopify / Square Capital** — ITIN-accepted financing on sales history, no credit pull.
-

PART B — Companies & Products: No-PG, Soft-Pull Prequalification & ITIN Access

How to read this report

Three terms get used loosely in the market. Getting them straight is the key to the whole report:

Term	What it actually means	Why it matters for an ITIN holder
No Personal Guarantee (no-PG)	The business — not you personally — is liable for the debt. You don't pledge personal assets.	Common on cash-balance corporate cards. Does not by itself mean "no SSN needed."
No personal credit pull	The issuer never touches your personal credit file — not even a soft inquiry. Underwriting rests on business cash balance, raised capital, or platform sales.	The best outcome for a thin-file or ITIN-only applicant — your personal credit (or lack of it) is irrelevant.
Soft-pull prequalification	The issuer does a <i>soft</i> personal-credit inquiry (no score impact) to generate a real, non-binding offer. A <i>hard</i> pull lands only when you accept or draw funds.	Your personal credit is checked — just gently, and only until you commit. Still needs a personal identifier (SSN or ITIN).

A critical, repeated finding: **"no-PG" and "no SSN" are different things**. Almost every legitimate no-PG corporate card still verifies the *identity* of a beneficial owner (KYC / USA PATRIOT Act). That identity step — not the underwriting — is where ITIN-only applicants hit friction.

The single most important takeaway: For an ITIN-only founder, the strongest products are those that do **no personal credit pull at all** and accept an **ITIN or passport** at the identity step — because then neither your credit file nor your lack of an SSN is a gate. The next best are platform/embedded lenders that underwrite on your sales history.

PART 1 — The Big Picture: Is Having Only an ITIN an Issue?

Bottom line: Having only an ITIN is *not* a hard blocker, but it narrows your options and — as of mid-2026 — is becoming a bigger friction point.

There are three distinct pathways into US business credit, and an ITIN-only founder can use all three:

- 1. Personal-credit-based business cards** (e.g., Chase Ink, Capital One Spark, Amex Business). These explicitly accept an **ITIN in place of an SSN**, pull your personal credit, and require a personal guarantee. This is the *most firmly documented* ITIN path — but it requires a personal credit history.
- 2. Cash-flow / no-PG corporate cards** (Brex, Ramp, Rho, Mercury IO, Stripe). These underwrite on your **business bank balance or raised capital**, not personal credit — so no PG and often **no personal credit pull at all**. The catch: they still collect a personal identifier for KYC. Whether they accept an ITIN/passport at that step varies by issuer and is the make-or-break variable.
- 3. EIN-only business credit** (net-30 vendors + business bureaus). Builds a *business* credit file keyed to your EIN/DUNS — essentially no personal-identity barrier beyond the EIN, which an ITIN holder can obtain.

Why issuers ask for an SSN even on "business" products

The SSN request usually serves one of two *separable* functions:

- **Underwriting** — only relevant for products that pull your *personal* credit (path 1). Pulling credit requires a personal identifier, and bureaus *can* generate a report keyed to an ITIN.
- **Identity / KYC / AML** — required on virtually everything under the **USA PATRIOT Act (CIP rule)**, the **beneficial-ownership (CDD) rule**, and **OFAC** screening. For a *non-US person*, the CIP rule explicitly allows an **SSN, ITIN, EIN, or passport number** as a valid identifier. So banks *can* legally accept an ITIN — whether a given fintech *does* is a policy choice.

Key insight: On no-PG cash-balance cards, the SSN ask is almost always a KYC/identity requirement, not an underwriting one. That's the boundary where an ITIN-only founder's experience differs by issuer.

New 2026 regulatory headwind

A May 2026 Executive Order, "Restoring Integrity to America's Financial System," directs federal regulators to treat customer immigration status as a financial-risk factor. It specifically states that **use of an ITIN to obtain credit products or open deposit accounts where the applicant lacks verified lawful immigration status may be flagged as a risk factor requiring enhanced due diligence**.

Critically: - It does **NOT** ban ITIN accounts or ITIN credit applications, and does **not** require banks to close existing accounts or collect citizenship data from current customers (a mandatory-data-collection draft provision was dropped after industry pushback). - Treasury was directed to issue a **red-flags advisory (~mid-July 2026)** and propose **BSA rule changes (~mid-August 2026)**. - **Practical effect:** an ITIN-only applicant may face **more identity questions and enhanced due diligence**, especially without verified lawful status — but ITIN credit access remains legal.

This is a fast-moving area. Reconfirm the current Treasury guidance before applying.

PART 2 — No-Personal-Guarantee Corporate & Business Cards

These underwrite on business cash/capital, not your personal credit. **No-PG ≠ no-SSN** — the ITIN column is what matters for you.

Company	Product type	No PG?	Personal credit pull?	ITIN / no-SSN path	Key approval requirements
Ramp	Corporate charge card	Yes	None	Strongest documented — apply with foreign passport + proof of address instead of SSN	~\$25K in a US business bank account; incorporated/LLC/ partnership (no sole props); mostly US operations
Stripe Corporate Card	Charge card (Stripe Issuing)	Yes	Soft only (no hard)	Underlying Stripe account explicitly accepts ITIN (and non-US tax IDs)	Must be an existing Stripe processing customer; limit from processing volume
Brex	Corporate charge card	Yes	None	EIN-forward, but excludes non-US-registered companies ; ITIN at KYC <i>unverified</i>	~\$50K cash balance (funded startups); US-registered C/S-corp, LLC, LLP only; connect bank account
Rho	Corporate charge card	Yes	None		

Company	Product type	No PG?	Personal credit pull?	ITIN / no-SSN path	Key approval requirements
		•	•	Non-residents effectively need a US address or a US SSN-holder on the account	US corp/LLC/LP; underwrites raised capital + cash on hand; works pre-revenue
Mercury IO	Charge card (cash-backed)	Yes •	None •	Business accounts open with passport+EIN; Personal accounts reject ITIN ; IO-via-ITIN <i>unverified</i>	Hold a qualifying Mercury balance (~\$25K for meaningful limits); US entity + EIN
Revenued	Prepaid Visa + revenue-based Flex Line	Yes •	None (no credit check)	Plausibly accommodating (revenue-only), but <i>unverified</i>	≥1 yr in business; ≥\$20K/mo bank deposits; no sole props
Emburse	Commercial Mastercard (spend platform)	Yes •	None indicated	FAQ allows "personal or business ID number"; ITIN-specific <i>unverified</i>	Enterprise-oriented; verify one control person's identity
Navan	Corporate charge card	Yes •	None (company-level)	<i>Unverified</i> ; aimed at larger firms	~\$4M+ revenue typical; assessed at company level
BILL Divvy (Spend & Expense)	Charge card / spend line	Conditional •	Soft pull	<i>Unverified</i> •	~\$20K bank balance or steady cash flow; ≥3 mo in business
Capital on Tap	Revolving business credit card	No — PG required	Soft on personal + hard on business	Uses EIN/SSN; ITIN <i>unverified</i>	EIN for LLC/Corp; ~670+ FICO improves odds; ~\$25K balance
Torpago	Corporate charge card	Conditional (carve-out)	Marketed none	<i>Unverified</i>	Reportedly no longer accepting direct applications — verify availability

The standouts for an ITIN-only founder

- **Ramp** — the best-documented *no-SSN* path: their own onboarding lets an owner/officer apply with a foreign passport + proof of address. No PG, no personal credit pull.
- **Stripe Corporate Card** — the underlying Stripe account *explicitly* accepts an ITIN (and non-US tax IDs). No PG, no hard pull. Caveat: you must be a Stripe processing customer and limits derive from volume.
- **Revenued** — no PG and no credit check at all (revenue-only), so SSN/FICO are largely irrelevant — though explicit ITIN acceptance is *unverified* and it's technically revenue-based financing, not a true card.

Watch-outs: *Capital on Tap* is **NOT no-PG** (a personal guarantee is required despite a soft personal pull — proof that "soft pull" ≠ "no PG"). *Brex's* policies may shift following its **Capital One acquisition (closed ~April 2026)**. *Torpago* appears unavailable to new direct applicants.

PART 3 — Business Loans & Lines of Credit (Soft-Pull Prequalification)

This is where soft-pull prequalification lives. The table separates *whether* there's a soft prequal from *when* the hard pull lands and *whether* a PG is required.

Lender	Product	Soft-pull prequal?	Hard pull stage	PG required?	ITIN	Key requirements
Bluevine	Line of credit (≤\$250K)	Yes ■	On acceptance	Yes ■	Accepts SSN or ITIN (+ passport route)	12+ mo; \$120K+ revenue; FICO 625+
Fundbox	Line of credit	Yes ×	On first draw	Yes ■	Unverified ▲	600 FICO; 3–6 mo; bank-data underwriting
OnDeck	Term loan + LOC	Yes ■	On acceptance	Yes (+ lien on term) ■	Unverified ■	625+ FICO; \$100K+ revenue; 1+ yr
Amex Business Blueprint (ex-Kabbage)	Line of credit	No — hard pull upfront	At application	Yes ×	Unverified ▲	660 FICO; 1+ yr; ~\$3K/mo revenue
Credibly	MCA / working capital / LOC	Yes ■	If you proceed	Yes ▲	Unverified ▲	500 FICO (MCA); \$15K/mo revenue; 6 mo
Backd	LOC + working capital	Claimed (unverified) ▲	Unverified	No PG on the LOC ■	Unverified ▲	~650 FICO; 1–2 yr; high revenue floor
National Funding	Working capital / equipment	Yes ■	At final decision	Likely ■	Unverified ■	~600 FICO; 6+ mo; ~\$250K revenue
Rapid Finance	Term / LOC / MCA	"No-hard-check" prequal, but hard pull on full app	At application	Yes ×	Unverified ▲	2+ yr / ~\$120K revenue best
Giggle Finance	Revenue-based (gig/1099)	Yes (no score-based UW)	—	(MCA, assumed)	Unverified (very accessible model)	3+ mo; 1099 income; bank link
Mercury	Working capital / venture debt	Unverified ■	Unverified	No PG (working capital) ■	Unverified ×	Ecommerce/VC focus; not available in CA
Lendio	Marketplace (75+ lenders)	Yes	At matched lender	Varies	Depends on lender	Varies
Fundera (NerdWallet)	Marketplace	Yes	At matched lender	Varies	Depends on lender	Varies
Funding Circle	Term / LOC / SBA	Usually	Some structures / SBA	Yes (+ lien)	Not for SBA	660 FICO; 2+ yr; \$50K revenue

Embedded / platform lenders — underwrite on sales, not credit (best for ITIN)

These never pull personal credit; they fund off your platform sales history. The first three explicitly treat ITIN as identity-only.

Lender	Product	Personal credit pull?	PG required?	ITIN	Requirements
Shopify Capital	MCA / term loan from Shopify sales	None	No	Explicitly SSN or ITIN	Active Shopify store w/ sales; invitation-based
Stripe Capital	Advance on Stripe volume	None	No	Explicitly SSN or ITIN	Stripe processing history; offer-based

Lender	Product	Personal credit pull?	PG required?	ITIN	Requirements
Square Loans	Loan repaid via card sales	None	No (≤\$250K); >\$250K	SSN or ITIN (identity only)	Square processing history; ~\$10K+/yr
PayPal Working Capital	Advance on PayPal sales	None	No	Likely (unpublished)	PayPal account 90+ days; \$15K–\$20K/yr sales
PayPal Business Loan (LoanBuilder)	Fixed-fee term loan	Soft → hard on accept	Yes	Unverified	580+ FICO; 9+ mo; ~\$33K revenue

Avoid the SBA path if you're ITIN-only: 2026 SBA rules (Policy Notice 5000-876441) require **100% US-citizen/national ownership**, disqualifying ITIN-only owners. This affects SBA loans routed through Lendio, Fundera, Funding Circle, Live Oak, etc.

Synthesis

- **True soft-pull prequal (credit checked, but softly until you commit):** Bluevine, Fundbox, OnDeck, Credibly, National Funding, PayPal Business Loan, and the marketplaces (Lendio, Fundera). Marketplaces are the efficient way to comparison-shop on a single soft pull.
- **No personal credit pull at all:** Shopify Capital, Stripe Capital, Square Loans, PayPal Working Capital, Mercury Working Capital, and (per reviews) Backd's LOC.
- **Worst for rate-shopping:** Amex Business Blueprint (hard pull upfront, no soft option) and Rapid Finance (markets "no-hard-check" prequal but hard-pulls on the real application).

PART 4 — Deposit-Focused Neobanks & Their Credit Products

Key finding: No mainstream business-banking fintech offers a *true underwritten revolving credit line* an ITIN-only newcomer can easily access. The ITIN-accessible credit at these companies is almost entirely **cash-balance charge cards** (Mercury IO, Rho, Meow) that do no personal credit pull — so an SSN isn't a *credit gate*, only KYB is.

Company	Deposit ITIN-friendly?	Credit product	No PG?	Credit pull	Notes
Mercury	Business: passport + EIN, no SSN	IO charge card	Yes	None	Strongest combined deposit+credit story for non-resident <i>business</i> founders. Personal accounts are SSN-only. Tightened address KYB in 2025.
Wise (Business)	Most flexible (SSN, ITIN, or ID+selfie)	None	—	None	Great for ITIN deposits; no credit product at all .
Bluevine	SSN or ITIN for identity	Real revolving LOC	No (PG req'd)	Soft → hard	Has <i>real</i> credit, but LOC needs FICO 625+, 12 mo, \$120K revenue + PG — hard for a new ITIN-only founder.
Baselane	Explicitly SSN or ITIN	Partner loans only	n/a	n/a	Real-estate niche; no native credit card.
Novo	Listed SSN or ITIN	Invite-only card + MCA "Funding"	n/a	Soft (Funding)	Card is invite-only; Funding is an MCA (~\$500/mo revenue).

Company	Deposit ITIN-friendly?	Credit product	No PG?	Credit pull	Notes
Relay	SSN expected for owners	Cashback card	Unverified	None for opening	Good for foreign-owned US LLCs, but owner-level SSN expected; ITIN substitution unconfirmed.
NorthOne	SSN expected	Marketplace LOC/loans	Per lender	Per lender	Credit is a referral, not native.
Lili	Non-resident: passport + EIN	None	—	—	No credit product. Conflicting SSN guidance (resident vs non-resident flows).
Rho	Unverified	Corporate charge card	Yes	None	No published ITIN support; US-incorporation oriented.
Meow	Unverified	Corporate card	(inferred)	None (inferred)	Treasury/startup focus; not immigrant-targeted.
Grasshopper / Live Oak	SSN-based (chartered banks)	Cards / SBA loans	No (PG req'd)	Hard	Traditional underwriting; least ITIN-relevant.

Immigrant / ITIN-focused providers

Company	Type	ITIN	Credit product
Comun	Consumer neobank (Latino immigrants)	Opens with ITIN/passport, no SSN	Deposit + nascent/secured credit-builder
Majority	Consumer neobank (immigrants)	ITIN accepted (may not even be required)	No credit product
Welcome Tech / SABEResPODER	Immigrant services + banking (Green Dot)	ITIN-friendly	Partner-mediated credit (thin detail)
Camino Financial	Immigrant <i>business</i> lender	Secured/micro loans accept ITIN-only (no min FICO)	Unsecured loans require SSN
Tomo	Consumer credit card	Accepts ITIN	Credit card (cash-flow underwriting)
Petal	Consumer credit card	Accepts ITIN/passport/visa	Credit card (<i>verify still issuing in 2026</i>)
Self	Consumer credit-builder	SSN or ITIN	Credit-builder account + secured Visa, no hard pull
Sequin	Consumer debit + credit-building	SSN required	Debit (not a credit line)
Stilt	Was immigrant lender	—	Effectively defunct (platform sold to J.G. Wentworth, 2022)
Nova Credit / Highnote	Infrastructure (not openable accounts)	n/a	<i>Power</i> ITIN-friendly products at other issuers (e.g., Amex newcomer underwriting)

PART 5 — The EIN-Only Pathway: Build Business Credit Without an SSN

This is the most reliable, lowest-friction route for an ITIN-only founder because it leans on the *business* identity, not yours.

1. **Form a US LLC or corporation** and obtain an **EIN** from the IRS — an ITIN holder qualifies to request one.

2. **Get a free D-U-N-S number** from Dun & Bradstreet (tied to the EIN, not your SSN).
3. **Open net-30 vendor accounts** that report to business bureaus with EIN only (no personal credit check):
 4. **Uline** — reports to all 3 business bureaus; needs business name + EIN; orders ~\$50+ to be reported.
 5. **Quill** — easy approval; EIN + ~30 days in business; reports to D&B.
 6. **Grainger** — EIN + ~3 months in business; DUNS ideal.
 7. **Crown Office Supplies** — no personal credit check; 90 days in business; active EIN.
8. **Add Nav Prime** to report 1–2 monthly tradelines to D&B, Experian Business, and Equifax Business.
9. The three **business bureaus** (D&B PAYDEX, Experian Business, Equifax Business) typically surface payment history after ~60–120 days.

This builds a **business** credit profile independent of your personal SSN/ITIN.

Note: Avoid older guides citing **Nearside** (shut down 2022/23) or the **Tillful card** (acquired by Nav in 2023; card discontinued — use **Nav Prime** instead).

PART 6 — Recommended Action Plan for an ITIN-Only Founder

Foundation (do first): 1. Register a US LLC/corporation; get an **EIN** using your ITIN. 2. Secure a **US business address** and open a **US business bank account**. If traditional banks balk, use **Mercury (Business)**, **Wise**, **Comun**, or **Majority** — all open with ITIN/passport. 3. Register a free **D-U-N-S** number.

(a) For a no-PG corporate card: 4. Fund the business account with a real balance (~\$25K helps for Ramp; ~\$50K for Brex). 5. Apply to **Ramp** (best no-SSN path) or **Stripe Corporate Card** (explicit ITIN). Have your **ITIN, passport, and EIN** ready, and **ask the issuer directly whether ITIN/passport satisfies the beneficial-owner identity check** — this is the make-or-break step and is not uniformly documented. 6. In parallel, build EIN-only net-30 tradelines + Nav Prime.

(b) For business financing: 7. If you sell on a platform, pursue **Shopify Capital / Stripe Capital / Square Loans** — no credit pull, no PG, explicit ITIN acceptance (identity only). 8. For a credit-underwritten line, **Bluevine** openly accepts ITIN (but requires FICO 625+, \$120K revenue, and a PG). 9. For a term loan, use **Camino Financial's secured/micro business loan** (accepts ITIN-only, no min FICO). 10. **Avoid the SBA path** — 2026 rules require 100% US-citizen ownership.

(c) If you need to build personal credit first: 11. **Self** (credit-builder + secured Visa, ITIN OK, no hard pull) and consumer cards like **Tomo / Petal** (ITIN accepted) can establish a personal file that later unlocks personal-credit business cards (Chase Ink, Capital One Spark, Amex Business — all accept ITIN).

Quick-Reference: Best Bets for an ITIN-Only Applicant

Need	Best options	Why
No-PG corporate card	Ramp, Stripe Corporate Card	No PG, no personal credit pull, documented no-SSN/ITIN path

Need	Best options	Why
Business financing, no credit pull	Shopify / Stripe / Square Capital	Sales-based, no PG, explicit ITIN (identity only)
Real revolving credit line	Bluevine	Openly accepts ITIN (but PG + FICO 625+ required)
Business term loan, ITIN-only	Camino Financial (secured/micro)	Rare business loan accepting ITIN-only, no min FICO
ITIN-friendly business deposits	Mercury (Business), Wise, Baselane	Open with passport/ITIN + EIN, no SSN
Build personal credit (ITIN)	Self, Tomo, Petal	Accept ITIN; no/soft pull
Build business credit (EIN-only)	Uline, Quill, Grainger, Crown + Nav Prime	No personal credit check at all

PART C — Credit Bureau Reporting Matrix

How to read this — five things that matter

- 1. **Business bureaus ≠ consumer bureaus.** Building *business* credit (D&B PAYDEX, Experian Business, Equifax Business) is a completely separate file from your *personal* credit (Equifax/Experian/TransUnion). Most fintech business products that report do so to **business** bureaus only.
- 2. **No-PG = usually nothing to your personal credit, ever.** Without a personal guarantee there's no individual liable, so true no-PG corporate cards generally report **nothing — positive or negative — to consumer bureaus, even on default**. The generic "a missed business-card payment hits your personal credit after 60 days" warning applies to **PG-backed** cards, not genuine no-PG cards.
- 3. **SBFE is not a bureau** — it's the Small Business Financial Exchange, a member data co-op that *feeds* D&B, Experian, Equifax, and LexisNexis. "Reports to SBFE only" means the data *can* surface in business reports but through a single, narrower channel.
- 4. **Reporting is voluntary.** No law requires any issuer or vendor to report. Practices change without notice — verify before relying on any single tradeline.
- 5. **"Default-only" is a trap for credit-builders.** A product that reports *only* missed payments (e.g., Uline, per several sources) can hurt you but won't build positive history. For building credit you want **ongoing positive** reporting.

The headline: If your goal is to **build business credit with zero personal-credit exposure**, the cleanest, best-documented tools are **Brex, Ramp, Mercury IO, Relay, and Nav Prime** (all report ongoing positive history to all three major business bureaus, no PG). For a thin **personal** file on an ITIN, **Self** is the strongest confirmed builder.

PART 1 — No-PG Corporate / Charge Cards

Card	Reports?	Business bureaus	Consumer bureaus	Positive or default-only	Builds business credit
Brex	Yes	D&B, Experian, Equifax (direct)	Never	Positive, ongoing	Yes (strong)
Ramp	Yes	D&B, Experian, Equifax	Never	Positive, ongoing	Yes (strong)
Mercury IO	Yes	D&B, Experian, Equifax	None	Positive, ongoing	Yes (strong)
Rho	At discretion	D&B/Exp/Equifax (exact list unverified)	Never	Positive, ongoing	Yes (discretionary)
Stripe Corp Card	Yes	SBFE only (→ may reach the three)	None (soft pull only)	Unverified (pos vs default)	Weak (SBFE-only)
Revenued	Yes	SBFE (→ D&B)	None	Positive (timely pmts)	Yes

Card	Reports?	Business bureaus	Consumer bureaus	Positive or default-only	Builds business credit
BILL Divvy (Spend & Expense)	Yes	SBFE → D&B, Equifax, Experian, LexisNexis	Only if PG signed + default	Positive (on-time)	Yes
Torpagio	Yes	D&B confirmed; full list unverified	None	Positive (on-time)	Yes
Emburse	Personal: no (unless delinquent); business: unverified	Unverified	Possibly on delinquency (unverified)	Unverified	Not marketed
Navan (corporate)	Generally NO to business bureaus under owner	None	None	N/A	No
Capital on Tap <i>PG required</i>	Yes	Experian, D&B	Yes — on default (PG)	Positive to biz; default-only to personal	Yes

Takeaways: *Brex, Ramp, Mercury IO* are the gold standard — all three business bureaus, ongoing positive, never touch personal credit. *Stripe / Revenued / BILL Divvy* build via the narrower SBFE channel. *Navan* and *Emburse* are expense-management tools, not credit-builders. **Capital on Tap is the one card here that *can* hit personal credit on default — because it requires a personal guarantee** (it is not a true no-PG card).

PART 2 — Business Loans, Lines of Credit & Embedded Lenders

Lender (product)	Reports?	Business bureaus	Consumer bureaus	Positive or default-only	Builds business credit
OnDeck (loan/LOC)	Yes, monthly	Experian, Equifax, PayNet	No (routine)	Positive + negative	Yes (strong)
Amex Business Blueprint (LOC)	Yes, monthly	D&B, Experian Bus, Equifax Bus	No	Positive + negative	Yes
Bluevine (LOC)	Yes	Experian Business (some cite D&B)	Default-only (PG)	Positive + negative	Yes
Fundbox (LOC)	Yes	SBFE → Exp/Equ/D&B	Experian consumer (negative only)	Positive + negative	Yes
Funding Circle / iBusiness (term)	Yes	Experian Bus, D&B (not Equifax)	No (PG default aside)	Positive + negative	Yes
PayPal Business Loan / LoanBuilder	Yes	D&B, Experian Bus, Equifax Bus	No	Reported (some say negative-triggered)	Yes
Credibly (MCA / loans)	MCA: No; loans: maybe	3 major business (non-MCA only)	No	Positive (non-MCA only)	Only via non-MCA products
Giggle Finance (MCA)	Yes	Type ambiguous	Experian + TransUnion (likely consumer)	Positive + negative	Marketed loosely
Rapid Finance (loans/MCA)	Default-only	Unverified	Default-only	Default-only	No

Lender (product)	Reports?	Business bureaus	Consumer bureaus	Positive or default-only	Builds business credit
National Funding	Conflicting / unverified	Unverified	Unverified	Unverified	Unverified
Backd (advance/ LOC)	Unverified (likely no)	Unverified	Unverified	Unverified	Not marketed
Mercury Working Capital (loan)	Unverified (loan) — IO card does report	IO card: Exp/Equ/ D&B	No (no PG)	Unverified	Unverified (loan)
Stripe Capital	SBFE only	SBFE → business bureaus	No	Performance to SBFE; collections on default	Indirect / neutral
Shopify Capital	No (default exception)	None	No	Default-only if any	No
Square Loans	No	None	No (collections exception)	Neutral	No
PayPal Working Capital	No	None	None	Neither	No

Takeaways: - **Strongest builders (ongoing positive):** OnDeck, Amex Business Blueprint, Fundbox, Bluevine, Funding Circle, PayPal **Business Loan/LoanBuilder**. - **The famous "report nothing" group is confirmed: Square Loans, Shopify Capital, PayPal Working Capital** — convenient and credit-invisible, but they build no credit. Stripe Capital is the nuance: it touches SBFE (business side) but isn't marketed as a builder. - **MCAs generally don't report** (Credibly's MCA, Rapid Finance's MCA). **Giggle Finance** is the exception — and it likely reports to **consumer** Experian/TransUnion, so for a sole proprietor it can affect *personal* credit. - **Personal-credit exposure** in this group comes almost entirely via **personal guarantee on default** (Bluevine, Funding Circle) or **collections** (Square/Stripe/Shopify on default) — not from ongoing reporting.

PART 3 — Neobank Credit Products & Credit-Building Tools

Product	Reports?	Business bureaus	Consumer bureaus	Positive or default-only	Builds business credit
Mercury IO	Yes	D&B, Experian, Equifax	No	Positive, ongoing	Yes (strong)
Relay Visa Credit	Yes	D&B, Experian, Equifax	No	Positive, ongoing	Yes (strong)
Nav Prime (+ Prime Card)	Yes	D&B, Experian, Equifax	No	Positive, ongoing	Yes (strong)
Credit Strong (Business)	Yes	Equifax Business + PayNet + SBFE only (not D&B/Experian)	No (business product)	Positive, ongoing	Yes (narrow)
Novo (card / Funding)	No (currently)	None	Unverified	—	No
Meow (corporate card)	No confirmed	None/unverified	No (no credit check)	—	No / unverified

Product	Reports?	Business bureaus	Consumer bureaus	Positive or default-only	Builds business credit
NorthOne	Account: no; LOC (Kanmon): unverified	Unverified	LOC likely PG	—	LOC unverified
Baselane	No (debit card only)	None	Tenant rent reporting → tenant's consumer credit	N/A	No
Tillful	Defunct (folded into Nav, 2023)	Historically business	—	—	Use Nav Prime instead

Takeaways: *Mercury IO, Relay, Nav Prime* all report ongoing positive to all three business bureaus — the best neobank/tool builders. **Credit Strong Business is real but siloed** to Equifax/PayNet/SBFE, so it won't appear on a D&B PAYDEX or Experian Business pull. **Novo, Meow, Baselane, NorthOne** are *not* reliable business-credit builders right now.

PART 4 — Net-30 Vendor Accounts (the EIN-only credit-building base)

Vendor	Reports?	D&B	Experian Bus	Equifax Bus	Other	Notes
Crown Office Supplies	Positive				—	Standout — reports to all 3. \$99/yr, DUNS required
Quill	Positive				—	Reports ~90–120 days after opening
Grainger	Positive		(recent)		—	DUNS + ~\$50 min order
Wise Business Plans	Positive	Disputed			Creditsafe	\$99 fee; D&B unverified
Strategic Network Solutions	Positive	/loose			Creditsafe	Reports last business day monthly
Uline	Contested			claimed	—	May report negatives only (default-only) — not reliable for positive building
Summa Office Supplies	Likely defunct net-30	(was)	(was)	claimed	—	Verify before using

Takeaways: For EIN-only credit building, **Crown Office Supplies** is the best single starter (all three bureaus). **Quill and Grainger** are solid (D&B + Experian). **Uline is the biggest trap** — multiple sources say it reports *only* negative/late activity, so it can hurt but may not help. **Wise Business Plans** and **Strategic Network Solutions** lean on **Creditsafe** (a smaller commercial bureau) alongside Experian/Equifax.

PART 5 — Consumer & ITIN-Focused Products (Personal Credit)

These matter for an ITIN holder building a **personal** credit file from scratch.

Product	Reports?	Consumer bureaus (which)	Positive or default-only	Good for ITIN credit-building?
Self (Builder + secured Visa)	Yes	All 3 (Equifax, Experian, TransUnion)	Full positive, ongoing	Excellent — no credit check, ITIN-friendly, two tradelines
Majority (Visa secured)	Yes	"One or more" — <i>which</i> unverified	Positive + negative	Plausibly good (immigrant-built); confirm bureaus
Tilt (Petal's successor)	Yes	All 3	Full positive	Likely; ITIN acceptance unverified
Petal 1 / Petal 2	Existing holders only	All 3	Full positive	Closed to new applicants (now Tilt)
Capital One Spark (standard variants)	Yes	All 3 personal (+ business bureaus)	Full positive	Rare business card that builds personal credit (Spark Cash Plus / Venture X Business = default-only)
Chase Ink (business)	Yes	Personal: default-only	Business positive; personal default-only	Builds business credit, not personal
Amex Business	Yes	Personal: default-only (60+ dpd)	Business positive; personal default-only	Builds business credit, not personal
Tomo (credit card)	Not currently	Formerly all 3; none now (bureaus dropped it in 2024)	N/A	Avoid until reporting resumes
Sequin	Credit feature discontinued	Formerly Experian only (disputed)	N/A	No
Comun	Credit product in development	None confirmed	Unverified	ITIN banking yes; not a confirmed tradeline
Camino Financial (business loan)	Unverified	None (business product)	Unverified	Not a personal-credit tool
Stilt	Defunct (sold to J.G. Wentworth)	—	N/A	No

Takeaways: - **Best confirmed for an ITIN thin file: Self** (all 3 bureaus, no credit check, two tradelines) and **Majority Visa secured** (immigrant-built — confirm which bureaus). **Tilt** if ITIN is accepted. - **Of the ITIN-accepting business cards, only Capital One Spark (standard variants) builds *personal* credit** with ongoing positive reporting. **Chase Ink and Amex Business build business credit only** and touch personal credit just on default — poor choices for a thin personal file. - **Do not rely on:** Tomo (not reporting in 2026), Sequin (feature gone), Stilt (defunct), or Comun-as-a-tradeline (credit product unconfirmed).

PART 6 — Strategy: Building Both Files on an ITIN

To build BUSINESS credit (no personal-credit exposure): 1. Foundation: US entity + EIN + **DUNS number**. 2. Open **3–4 net-30 vendors** that report positive — lead with **Crown Office Supplies** (all 3 bureaus), add **Quill** and **Grainger**. Avoid relying on **Uline** for positive history. 3. Add a reporting **charge card / tool: Ramp** or **Brex** (all 3 business bureaus, no PG, no personal pull) and/or **Nav Prime** (monthly tradeline to all 3). 4. After 6–12 months, graduate to a reporting **lender** (OnDeck, Amex Business Blueprint, Bluevine) for larger limits.

To build PERSONAL credit on an ITIN: 1. Start with **Self** (Credit Builder + secured Visa → all 3 consumer bureaus, no credit check). 2. Add **Majority** secured Visa or **Tilt** (if ITIN accepted). 3. Once a personal score exists, a **Capital One Spark** card can add ongoing positive *personal* reporting while also funding the business.

Avoid for credit-building (they report nothing): **Square Loans, Shopify Capital, PayPal Working Capital** — great for cheap, credit-invisible capital, but they build no file.

Quick Reference: "Reports Ongoing Positive to All 3 Business Bureaus"

* **Brex · Ramp · Mercury IO · Relay · Nav Prime · Amex Business Blueprint · Crown Office Supplies** (net-30)

Quick Reference: "Reports Nothing (Credit-Invisible)"

Square Loans · Shopify Capital · PayPal Working Capital · Navan · Novo · Meow · Baseline

Quick Reference: "Touches PERSONAL Credit"

- **On default only (PG):** Capital on Tap, Bluevine, Funding Circle, Chase Ink, Amex Business
 - **Ongoing positive (consumer bureaus):** Self, Majority, Tilt, Capital One Spark (standard), and likely Giggle Finance (sole props)

Important Caveats & Methodology

- **Point-in-time, June 2026.** Fintech approval criteria, ITIN policies, product availability, and bureau-reporting practices change frequently and reporting is voluntary. **Confirm every detail directly with the provider before applying or relying on a tradeline.**
- **How this was researched.** Compiled from nine parallel research agents sweeping no-PG corporate cards, fintech business lenders and embedded platforms, deposit-focused neobanks, net-30 vendors, ITIN-access analysis, the soft-pull prequalification landscape, and credit-bureau reporting. Sources include issuer help centers and product pages, business-credit specialists (Nav, Credit Suite, Business Credit Workshop, Dun & Bradstreet), independent reviews (NerdWallet, Bankrate, Merchant Maverick, Finder, Kudos, United Capital Source), and regulatory/legal sources (FinCEN CIP guidance, Federal Register CDD rule, White House Executive Order, Mayer Brown, Time).
- **WebFetch was frequently blocked (HTTP 403)** on primary help-center pages (Mercury, Stripe, Ramp/Brex support, Nav, OnDeck, vendor sites). Many findings therefore rely on search-result snippets cross-referenced across reputable third parties. Items that could not be confirmed to a primary source are marked **unverified** throughout.
- **ITIN acceptance is firmly verified only where stated** — explicitly documented for Stripe, Shopify Capital, Square Loans, Bluevine (identity), Self, Tilt, Tomo (historically), Camino (secured), Comun, Majority, and Wise. For Ramp the verified path is "foreign passport instead of SSN." For Brex, Mercury IO, Rho, Meow, and most loan products, ITIN acceptance is **unverified** — treat as "ask first."
- **Highest-confidence reporting findings:** Brex, Ramp, Mercury IO, Relay, Nav Prime, Self, Crown, Quill, Grainger, OnDeck, Amex Blueprint, and the "report nothing" group (Square / Shopify / PayPal Working Capital).
- **Lowest-confidence / verify directly:** Rho's exact bureau list; Stripe Corp Card positive-vs-default; Emburse & Torpago full bureau lists; Backd, National Funding, and Mercury Working Capital (loan) reporting; Uline's positive-vs-default scope; Summa's availability; Wise Business Plans' D&B; Majority's specific consumer bureaus; Giggie's bureau type; Comun's credit product.
- **2026 status changes to note:** Brex acquired by Capital One (~April 2026); Torpago paused direct applications; Tomo not currently reporting; Petal closed to new applicants (now Tilt); Sequin discontinued credit-building; Tillful folded into Nav; Stilt defunct. The May 2026 Executive Order on ITIN/immigration banking is still being implemented (Treasury guidance due summer 2026).
- **Not legal or financial advice.** Consult a qualified advisor for your specific situation.
